Legacy Building Solutions Achieves IAS AC472 Accreditation for Building Manufacturing and Design

SOUTH HAVEN, Minn. — Legacy Building Solutions is proud to announce it has achieved International Accreditation Service (IAS) AC472 Accreditation for its Inspection Program for Manufacturers of Metal Building Systems.

The accreditation includes AC472 Part A – Fabrication of structural weldments and cold-formed products requiring welding and AC472 Part C – Design of Metal Building Systems.

IAS AC472 independently verifies a manufacturer's quality management system, engineering, fabrication, welding, inspection, traceability, and documented procedures.

“Achieving AC472 accreditation reinforces our commitment to delivering buildings our customers can trust,” said Dan Kumm, CEO of Legacy Building Solutions.

For customers, AC472 provides confidence that every Legacy building is produced under independently verified quality standards, reinforcing consistency, accountability, and code compliance while complementing Legacy's ISO 9001, CSA A660, and other industry certifications.

Legacy's Quality Management System has long reflected the principles of AC472. Achieving accreditation further strengthened our ISO 9001-certified processes by enhancing procedures, product traceability, documentation, and internal audit programs.

About Legacy Building Solutions Founded in 2010, Legacy Building Solutions designs, engineers, and constructs custom fabric building systems that combine the strength of rigid steel frames with the versatility and performance of fabric cladding. Serving industrial, commercial, and government sectors worldwide, Legacy delivers engineered solutions that
