By combining the strength and versatility of structural steel with the proven benefits of a fabric membrane, Legacy Building Solutions is proud to offer customized structures built to your exact requirements. Our design-oriented process enables us to develop dedicated solutions with your specific operation in mind, thus ensuring we’ll meet all your storage needs.
THE LEGACY ADVANTAGE

By selecting Legacy Building Solutions, you are not only receiving a configurable fabric building with multiple foundation options, you’re selecting a dynamic structural steel facility tailored to your exact specifications. These low maintenance and superiorly designed buildings create a practical solution for warehouse and industrial storage.

Customized Building - Create and design a structure specific to your operational needs. There is no limit to what we can build. With Legacy, you are not confined to any width, length or height restraints.

Versatility - Each building can be designed to support overhead cranes, fire suppression and lighting systems from the frame. The structures can also be relocated, reduced or extended and accommodate any size door.

Steel Frame Finishes - Our frames are offered in a grey primer finish, powder coat painted or for the ultimate protection, hot dip galvanized. Our structures can be lined for an additional corrosion barrier and impressive interior.

Cost Efficient - Our clear span interior provides you with the maximum usable floor space available. Our reduced construction times allow quicker occupancy often resulting in an economical advantage.

Structural Steel - With our rigid frame building design, we are using a proven method of engineering that has withstood the test of time. Our structural steel will outlast and outperform widely used hollow tube steel.

Translucent Cover - Our polyethylene or PVC fabric cover is non-conductive, which reduces condensation and sweating. The fabric roof also allows natural light to filter through, virtually eliminating the need for additional lighting during daylight hours.

Endurance - Backed by an exclusive 15-year warranty on the steel and fabric, our structures are engineered to handle any local wind, snow and seismic loads. Additionally, our buildings can be insulated (up to R-30).
