**Custom Fabric Structures for the Transportation Sector**  
*Legacy Building Solutions adds vehicle and fleet expert to sales team*

South Haven, Minn. – Legacy Building Solutions, a premier manufacturer of custom fabric structures, announces the addition of Sara Davis as Building and Project Design Consultant.

In her new role as Building and Project Design Consultant, Davis will focus on providing solutions for the port, aviation and transportation sectors. Legacy's fabric structures are custom designed to store and protect assets. In the transportation sector, the buildings may be used for applications including short- or long-term storage, showcasing, and upfitting chassis.

"Asset damage can slow a business for months," said Davis. "Using a building by Legacy Building Solutions for asset protection can potentially save millions of dollars in lost time and production." Davis added that the benefits of Legacy buildings for the transportation industry include clearspan design, rapid construction and complete design flexibility.

Davis's experience in the transportation industry spans nearly 20 years and includes sales and service at the dealership level, remarketing and finance at the auction level, and fleet management for a wide sector of truck applications across the country.

"Adding Sara to the team will give our transportation customers the benefit of working with someone who knows the transportation industry," said Jeff Williams, vice president of sales at Legacy Building Solutions. "Our focus is on helping the customer find the best solution for their specific application, whether that's protecting products newly arrived from overseas or vehicles ready for auction."

**About Legacy Building Solutions**

Legacy Building Solutions manufactures, designs and installs fabric buildings on a rigid steel frame. The company's mission is to provide innovative structure and service solutions that solve the needs of clients and partners. Legacy fabric structures are used for bulk storage, military shelters, aviation hangars and sports centers, among others.
